

# WE ARE HIRING!

## Backend and DevOps Engineer (F/M)

**more  
than  
metrics**

More than Metrics develops two software solutions ([www.smaply.com](http://www.smaply.com) and [www.experiencefellow.com](http://www.experiencefellow.com)) to help other companies provide exceptional customer experience. We have b2b-customers in more than 60 countries and grow with a triple-digit number each year. To strengthen our backend team we are looking as of now for a

### Backend and DevOps Engineer (F/M)

#### Your tasks

- You take care of our API-based software backend (Ruby on Rails)
- You plan and implement new features and the according database structure
- You help us build and maintain a robust continuous delivery process
- You keep an eye on our server infrastructure and perform updates and security checks
- You plan and conduct technical migrations
- You take over standby-duties for server maintenance in case of outages/errors
- You regularly review our API's performance and take measures to speed it up
- You closely collaborate with our frontend team

#### Your strenghts

- You are fluent in any mature object oriented programming language (ideally Ruby)
- You are confident with Linux server configuration and management
- Knowledge about Kubernetes, Docker or CI servers is a plus
- You are fluent in English
- You are a self-organized team player and also take over tasks on personal initiative

#### Our offer

- Minimum basic salary of at least 42.000 Euro p.a. (depending on your experience)
- 38,5 hours/week with flexible work time and optional home office
- A various set of tasks with growing responsibilities
- A young, international and open-minded team at our base in Innsbruck, Austria – a beautiful city in the alps with perfect conditions for all kinds of outdoor activities

#### Interested?

Please send us your application, including CV, letter of motivation and references, to [mail@morethanmetrics.com](mailto:mail@morethanmetrics.com). We're looking forward to meeting you!
