Software Engineer (m/f/x) Cloud Automation

Microservice Architecture / Kubernetes / Cloud Native / Autonomous Cloud / Continuous Delivery I Java

Fascinated by cutting-edge cloud technologies? You want to bring our customers to the next level on their journey to Autonomous Cloud Enablement and self-healing IT? You want to help our customers automate their release processes and put cutting-edge release validation and auto-remediation at our customer's fingertips?

Your role in the team

- Build an **enterprise-ready solution** based on our open-source framework Keptn
- Leverage **automation** and integrations with the Dynatrace Platform and bring world-class **IT operations experience** to our customers
- Implement exciting **DevOps Use Cases** (Canary, Auto-Remediation, Automated Operations, …) based on Dynatrace and Keptn
- **Leave a footprint**: Drive a new topic at Dynatrace and ensure pace and stability in the further development of our Cloud Automation Solution!

Your profile

- Software Engineer with interest in **Cloud-Native** Technologies
- Some experience in Software Delivery
- Good programming skills
- Knowledge of **CI/CD Tools, Microservice Architectures, and Kubernetes** is a plus
- **Golang** know-how is a plus

You will love this job if

- you look for new challenges **with Angular, React, JavaScript and TypeScript.**
- you appreciate **team spirit** and like swapping new ideas with your teammates.
- an **international environment** is attractive to you.

Teamspirit | World leading technologies | International & diverse | Flexible working hours | Regular team events | Education & training | Ergonomic workplaces | Discount for public transportation | Sports activities | Free fruits & cereals
